PROFESSIONAL SUMMARY

Senior Computer Science student with a strong foundation in software development and applied artificial intelligence. Experienced in building full-stack web applications and iOS applications using modern frameworks, and in developing AI-driven solutions through the Apple AI Foundation Program and real-world projects. Seeking opportunities that challenge my abilities, strengthen my potential, and support the continuous development of both my technical and professional skills.

EDUCATION

Saudi Electronic University

Expected December 2026

B.Sc. in Computer Science, College of Computing and Informatics | Riyadh, Saudi Arabia

EXPERIENCE

Apple Developer Academy, Tuwaiq Academy

Jul 2025 - Aug 2025

AI Foundation Intern (1st Cohort) | Riyadh, Saudi Arabia

- Selected as 1 of 66 participants nationally for the inaugural AI cohort, applying Challenge Based Learning to a real-world problem.
- Trained in artificial intelligence, product development and design thinking, building AI-powered iOS applications with Swift, Core ML and Create ML.
- Presented the solution to mentors and Apple Academy representatives, with a final review by international mentors.

PROJECTS

Saudi Cultural Tourism Platform - Graduation Project

2026

Front-End Developer, team of 4 | Vue 3, TypeScript, Pinia, Vite, NestJS, Playwright

- Built the complete front end across three role-based portals - tourist, provider and admin - against a NestJS REST API, with Pinia state management and a bilingual interface.
- Wrote the end-to-end Playwright suite covering all three portals, in an Agile and TDD cycle.

Kafeet - Complaint-Response Compliance Tool

2026

Solo | Amad Hackathon 2026, Tuwaiq Academy with Alinma Bank | JavaScript, Node.js, LLM integration

- Built a deterministic engine computing the SAMA-mandated complaint response deadline, a SHA-256 hash-chained audit log making any later edit detectable, and a server-side LLM call behind an output validator with a fixture fallback. Public repository (MIT) with a live demo.

Mulhem - iOS Application for Users with ADHD

2025

Team of 4 | Apple AI Foundation Program | Swift, SwiftUI, Core ML, Create ML

- Co-built an iOS application helping users with ADHD structure their thoughts and stay focused, with an LLM powering personalised suggestions; ran the user research and designed the interface.

Arabic Sign Language Recognition

2026

Solo | SDAIA Program | Python, MediaPipe, OpenCV

- Real-time system reading Arabic sign letters from a live webcam using 21-point hand-landmark tracking, composing them into words on screen, with a custom Arabic text-rendering pipeline to overcome OpenCV's lack of native Arabic support.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Swift, SQL

Web Development: Vue 3, Node.js, NestJS, REST APIs, HTML, CSS

Mobile Development: Swift, SwiftUI, Core ML

Tools & Practices: Git, GitHub, Playwright, Agile, TDD

CERTIFICATIONS

- Apple AI Foundation Program, 1st Cohort - Apple Developer Academy with Tuwaiq Academy (Aug 2025)
- Computer Vision for Developers - SDAIA, Saudi Data and AI Authority (Mar 2026)
- Artificial Intelligence Program - Samsung Innovation Campus with Misk Foundation (2026, in progress)

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency, B2)
